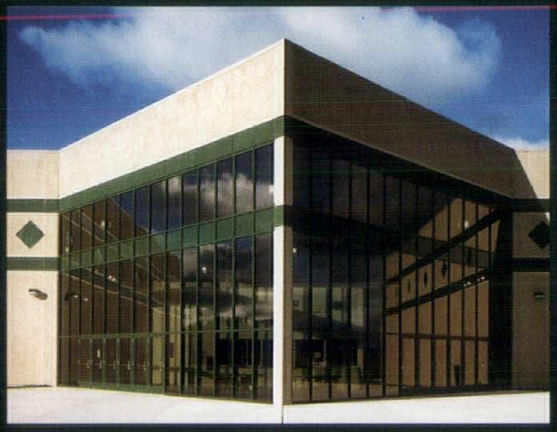
SPANCRETE



"Precast is the material of choice for climates like ours because you need to close up buildings quickly before bad weather moves in. Spancrete goes up fast and on time."

Keith Zimmerman, Project Manager
Oscar J. Boldt Construction Company

With over 50 years of experience, Spancrete continues to produce the premier wall panel system. The Spancrete® insulated wall panel offers speed of construction along with a durable, low-maintenance structure that stands the test of time.

For more detailed information about Spancrete® insulated wall panels and other precast, prestressed concrete products, please contact Spancrete.

Please accept, courtesy of the participating advertisers, this copy of the 2002 AIA Wisconsin "Construction Industry Handbook" issue of *Wisconsin Architect* magazine.

The Handbook edition is distributed throughout the state to 1,400 AIA Wisconsin members, as well as to 2,100 allied design and construction industry professionals, government officials, private industry leaders, media representatives with an interest in design, and local public and school libraries.

In addition, this special issue of *Wisconsin Architect* is provided to building owners and others throughout the year who contact AIA Wisconsin for a directory of architects and firms. It also is provided to public owners as part of AIA Wisconsin's innovative Qualification Based Selection (QBS) program. In total, over 4,000 copies of the special Handbook issue of *Wisconsin Architect* magazine will reach multiple readers this year.

You'll find this issue of the magazine to be a useful reference all year long. It is a unique source of information about AIA Wisconsin, its individual members and member-owned architecture firms.

Each year, the magazine features the work of Wisconsin architects in a creative format, provides practical informative articles of educational interest and presents a forum for suppliers to advertise their products and services in the specialized architectural marketplace. The Editorial Advisory Board continues to identify editorial content for publication.

This year, *Wisconsin Architect* magazine will be progressively unveiling a new look, including cover design and page format. The strong support of AIA Wisconsin members and advertisers is critical to the magazine's success and future growth. Thank you for your continued support; and I look forward to receiving your comments, questions, suggestions and articles.

Stepping Up to the Plate

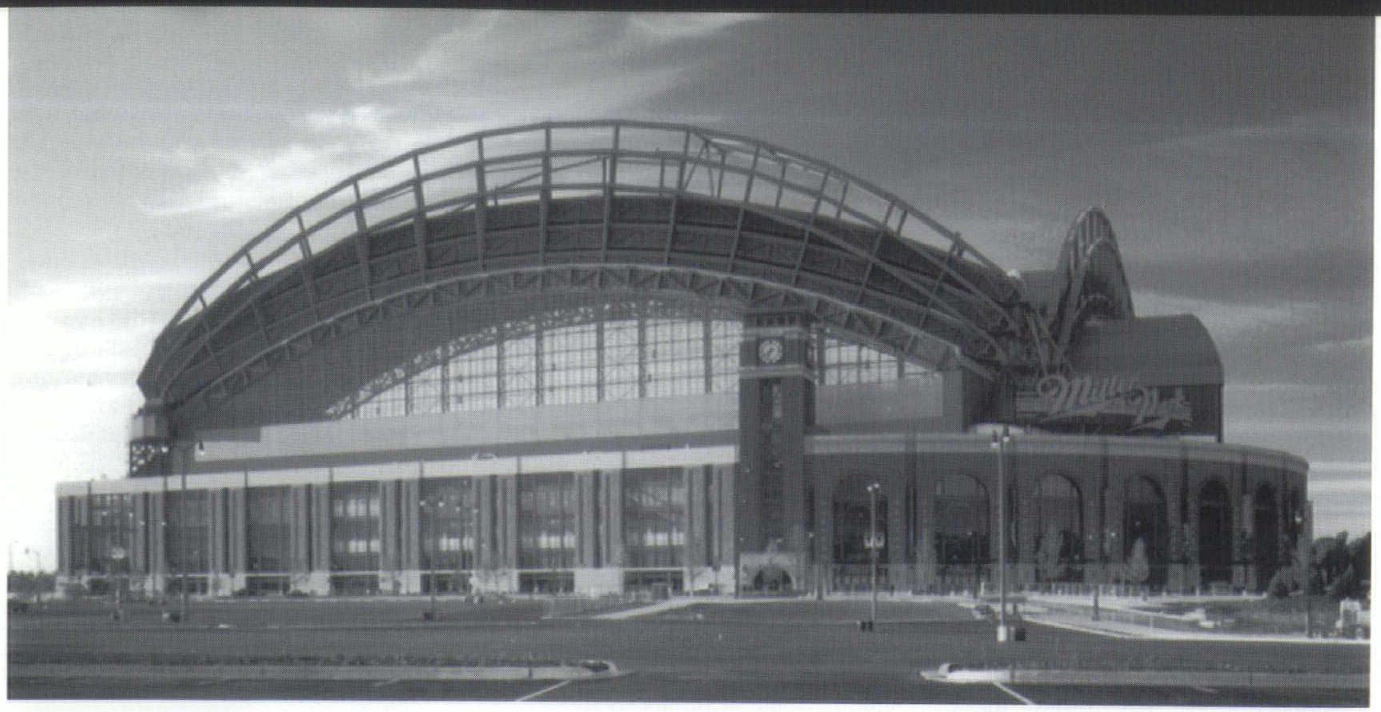
A new era began for the Milwaukee Brewers on April 8, 2001 when they played their 2001 season opener at Miller Park. The new 42,500-seat baseball facility has quickly established itself as one of the premier baseball venues in the world. It is a building designed to have the traditional feel of America's best ballparks, while at the same time, incorporating the latest in technological advances, from its high-tech digital scoreboards to its fan-shaped moveable roof.

Milwaukee County Stadium had served Milwaukee major league baseball well, but the facility, built in the early 1950s had become outdated. It was a pleasant ballpark with generally good sight lines, but it lacked the fan amenities of contemporary ballparks. The Milwaukee weather in the spring and fall made watching a ballgame in this open-air facility uncomfortable, contributing to low fan attendance. A new ballpark had to address these concerns.

The solution is Miller Park's most prominent feature, its moveable roof. This 12,000-ton fan-shaped roof structure was designed to clear-span 600 feet, open or close in 10 minutes and cover approximately 10 acres in area. Its lowest point above the playing field is 160 feet. The highest point is 250 feet. The roof consists of seven pie-shaped sections. Two are fixed; five move. The result is an enclosed stadium in bad weather and an open-air stadium in good weather. The building's mechanical systems allow the building to be heated to as much as 30 degrees above the outside temperature on cold days and cooled 15 degrees below outside temperature on hot days when the roof is closed, creating a fan-friendly indoor environment.

The roof is not the only moveable feature of the building. Two large translucent wall panels form the exterior wall of the ballpark beyond right field and left field. These panels are on tracks similar to aircraft hangar doors and can be moved to the side, opening the southeast exterior wall of the building in good weather. Combined with the roof, the wall panels, when open, give Miller Park the feeling of a traditional outdoor ballpark.

Early design requirements established for Miller Park by the Milwaukee Brewers and the Southeast Wisconsin Professional



Baseball Park District were that the building should be fan-friendly, look to the future while connecting strongly to baseball's traditions and be a "good fit" in Milwaukee.

In response, the architectural team of HKS-NBBJ-Eppstein Uhen developed the concept of the stadium as a "ballpark within a park." The building, sited on 265 acres of land in Milwaukee's Menomonee Valley, takes advantage of the adjacent tree-lined bluff to the west. On the eastern side of the site, sheet piling along the Menomonee River was removed and the riverbanks were restored to a more natural state. Extensive landscaping was designed surrounding the building. Brick, native lannon stone, precast concrete building elements, glass and steel were combined on the building exterior, relating to materials on the traditional baseball facilities of the past and connecting with Milwaukee's tradition of masonry construction. A clock tower provides a focal point near the homeplate entrance and relates to Milwaukee's history as a "city of towers."

The fan-friendly nature of the building begins with the ease of access to the site (requiring relocation of a major freeway spur) and continues with the ease of access to the building from the parking areas, which have a capacity for 13,000 cars. Statues of Hank Aaron and Robin Yount welcome visitors to the building. Inside, the seating bowl brings fans very close to the field and the action. Fans seated behind homeplate are closer to the batter than is the pitcher. Luxury suites are located on two levels, 20 at the Field Level and 50 at the Club Level. There are easy views to the field from the concourses to keep fans involved with the game even when they are visiting the numerous concession areas. The lower seating bowl is split to create a Loge Level, also to bring fans closer to the field.

Building amenities include a full service club level restaurant, the .300 Club, with stepped dining to afford excellent views of the game, and a family-style restaurant on the field level with an outdoor dining patio in left field. The service level, below the field level of the ballpark, includes team club houses, batting cages, food service storage facilities and prep kitchens, maintenance facilities, and a vehicular tunnel that allows team buses to traverse the entire level.

Miller Park's architectural, engineering and construction teams faced many challenges during the five years of design and construction. The building's sheer size, over 900,000 square feet of enclosed space and 500,000 tons of construction materials (sufficient to build a 50-story skyscraper), created challenging engineering and foundation problems. A combination of 325 drilled piers and 1,512 monotube piles, suggested by Wagner Komurka Geotechnical Group, and innovative structural design, by Ove Arup – Los Angeles and Mitsubishi Heavy Industries,

solved these issues. Ove Arup also developed computer models to design an HVAC system that must adjust quickly when the roof is opened or closed. HNTB-Milwaukee redesigned the portion of I-41, south of the I-94 expressway, to locate it east of the building location and developed the interchanges that speed traffic into and out of the Miller Park parking lots. The HCH Joint Venture coordinated the construction and developed the techniques for building this massive facility and the particularly challenging construction of the moveable roof.

Computer technology was used in many ways to resolve building design issues. Computer models were developed by Ove Arup to show the three-dimensional views of complicated steel connections that were used by the steel fabricators in developing their shop drawings. Acoustical consultants developed a computer model that allowed the Milwaukee Brewers and the Southeast Wisconsin Professional Baseball Park District to "hear" the acoustical environment using different materials. Computer analysis also was done from data obtained by wind-tunnel testing of building models to determine uplift force and potential snow loadings for the roof. Computers were also used to project shade and shadow patterns of sun on the playing field.

Beyond building issues, the project itself had many political and financing challenges that were met by the Southeast Wisconsin Professional Baseball Park District and the Milwaukee Brewers. In the end, the continuation of major league baseball in Wisconsin was assured by the successful construction of Miller Park.

On opening day, as President George W. Bush threw the first pitch in Miller Park, to the applause of a full house, the result was obvious. Baseball's newest ballpark was a hit. Professional baseball in Wisconsin had stepped up to the plate and hit a home run.

New Challenges & Choices

Gary A. Gust, AIA

What a difference one year, or even one day, can make.

The economy appears to have cooled down a bit. As 2001 was turning into 2002, members were overheard commenting that they were enjoying an opportunity to catch their breath and to appreciate a pace closer to what was once considered "normal" not that long ago. For the first time in several years, experienced and qualified people are available for employment. Now, contractors are calling us to attract our interest in them, instead of us having to call them to attract qualified bidders for our projects.

This year, we will be applying a new state building code to our designs. The new code promises to be more comprehensive, coordinated and contemporary; but it also has new terminology and a different organization and format. Architects, engineers, designers, plan reviewers and building inspectors will likely experience a year of heightened discussions about code interpretation and enforcement issues.

For 2002, AIA Wisconsin is focusing on the future of our profession. Last August, students, interns and young architects were invited to participate in the annual long-range planning retreat and to discuss their expectations and frustrations. This productive dialogue resulted in a commitment by AIA Wisconsin to encourage mentoring, establish a forum for young architects and explore opportunities for collaboration with other AIA components in our region.

What Does This Mean?

Over the past few years, the declining number of newly registered architects entering the profession has been a major topic for discussion at AIA Wisconsin Board of Directors meetings.

At the national AIA level, there has been much discussion about inclusiveness and broadening membership to architectural graduates pursuing so-called non-traditional careers outside of our profession.

AIA Wisconsin members view the issue from a different perspective. Our response has been to increase membership by building stronger relationships with students, interns, young architects and allied professionals. AIA Wisconsin is reaching out to these individuals by offering programs of value to interns, such as the ARE Preparation Program and IDP Workshop, by encouraging members to help build the future of our profession through mentoring, and by establishing a Young Architects Forum to encourage and support career development.

We have found that our members are committed to the integrity of our profession, which is heartfelt and deeply valued. We also have discovered that the younger members and future leaders of our profession share similar values. They are seeking the mentorship that our more experienced members can provide. This mentorship relationship is mutually rewarding. For example, mentors often benefit from the knowledge that younger members can share on new technologies and their application in practice.

This is the right approach for AIA Wisconsin. The message coming out of the long-range planning retreat was clear. The feedback was uniform and positive from a record number of diverse participants.

Where We Are

Our profession truly benefits from the infusion of new members and their full integration into the AIA. We are turning another corner. It requires investing in our membership for the future and nurturing leaders who will

be shaping our communities and our profession. They will help us broaden our perspective and range of influence.

AIA Wisconsin also understands that there are many benefits to broadening our base. It is important that we work to strengthen our relationships with other AIA chapters in our region. We will be investigating opportunities for greater collaboration in providing valuable programs and services to members.

Renewed Commitment

As the voice of the architecture profession in this state, AIA Wisconsin is dedicated to serving its members, advancing their value and improving the quality of the built environment. Our annual Convention & Expo and Fall Workshop programs are perfect examples of this dedication. Personally, I walk away from these programs invigorated, refreshed and with renewed energy. They bring back the aspirations that first attracted me to this profession.

Each day brings new challenges and a multitude of choices. This was never more apparent than during the past year. Become a leader and guide our profession by renewing your commitment to AIA Wisconsin. Help our profession build a quality environment for all people through involvement, mentorship and collaboration.

Gary A. Gust, AIA

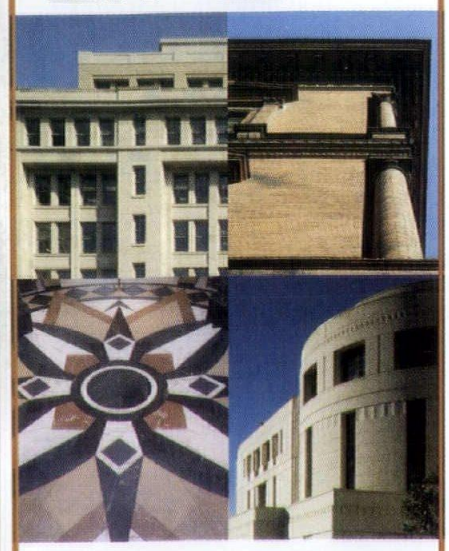
Why Specify Masonry for School Design

WE BUILD FOR LIFE



IN-OFFICE LUNCH BOX SEMINARS FOR ARCHITECTS AND DESIGNERS

UNION BUILT BY THE BEST HANDS IN THE BUSINESS

International Masonry Institute
Patrick Conway, AIA, CSI
(608)437-6871
pconway@imiweb.org

The decisions we make today are the legacy of our generation and reality for future generations. The process of school design is one of those few times a community will make significant physical decisions to expose their core values. Furthermore, the school you are designing today will speak volumes about your care and commitment to your children. Below are 17 reasons why you should use the building materials your father and grandfather preferred. Choose wisely, someone's life and reputation may depend on it.

Architect: Plunkett Raysich Architects; Photography: Eric Oxendorf

- **Abuse Resistant** – School buildings are being asked to serve as community buildings day and night – all year long. Even elementary school walls should be able to handle the daily grind of kids, evening community functions and maintenance equipment and solutions.

- **Acoustical Properties** – Forthcoming government guidelines and/or codes will direct higher STC ratings for our school's exterior and interior walls. Masonry meets many of these challenges. Other systems may have to add a layer or two.

- **Aesthetics** – Masonry is still, and always has been, the number one choice for school exterior and interior walls. Communities identify with masonry and are more willing to support a solid investment.

- **Cost** – When masonry is used as a loadbearing wall system (as it typically is) masonry can compete and/or beat any other wall systems. When properly designed, masonry interior partition walls are "initial cost" competitive and "life cycle cost" superior! Increase your wall system rewards and reduce your risk while saving money for more important items such as educational material.

- **Design Flexibility** – Because masonry is hand laid "modular" units, designers are free to express themselves with form, texture and

color. And if your design changes mid-way through the project, i.e. to add an exit door during the construction phase, masonry will adapt better than preformed wall systems.

- **Energy Savings** – Masonry buildings not only achieve high R-values, but their greatest advantage over other building materials is the ability to retain heat (thermal mass).

- **Environmentally Friendly** – Masonry is a natural material extracted from the earth. Our grandchildren or great grandchildren will thank you for having the foresight of how easy masonry recycles.

- **Fire Resistance** – Our children need a safe place to learn. Furthermore, if a school burns our children and their dreams will be dispersed until the school can be repaired or replaced.

- **Flexibility** – Contrary to popular belief masonry walls are easy to take down – especially if you plan for it. Also, with adequate floor preparation you can locate masonry walls anywhere. Remember, moving any wall system is a big job that includes re-doing the flooring material, ceiling tile, electrical, etc. In the whole scheme of things the "wall" is of minimal concern.

- **High Indoor Air Quality** – Masonry is a non-cellulose building material. Mold will grow fast on cellulose (wood or wood fiber) building products such as gypsum wallboard paper or "high-impact" gypsum additives. Mold can shut down your school and destroy teacher morale! Not to mention the high price of replacing interior finishes including, wallboard, ceiling tiles and carpet.

- **Image** – A solid, functional, long lasting school building represents community values.

- **Local Labor Force** – When you choose masonry you also choose to use your dollars to support local labor. Many times, non-masonry wall systems are shipped in from other regions or states, thus creating a void in local tax revenue.

- **Low Insurance Cost** – Ask your risk management experts how many thousands of dollars can be saved in lower insurance premiums with solid and safe masonry buildings.

- **Low Maintenance** – Ask any school district's buildings & grounds supervisor how many thousands of dollars per year can be saved by not having to patch, repair, replaced and/or paint non-masonry interior partitions.

- **Refuge** – In times of community danger or distress a masonry building will provide a safe place for shelter and protection.

- **Security** – School buildings have to respond to many different attacks including: tornadoes, straight-line winds, graffiti, vandalism, mold, explosives and gunfire.

- **Speed of Construction** – Masonry erection is fast and efficient. Often the pace of masonry is determined by the speed of other trades. You should feel empowered to challenge opinions to the contrary.

These masonry attributes have been listed in alphabetical order for your convenience. I suggest you reorganize this list to reflect your values. If you would like further assistance with your wall selection process we would be delighted to share detailed wall selection matrices with you and your design team.

EDITOR: The author is the International Masonry Institute Wisconsin Area Director. Pat can be reached at: pconway@imiweb.org or (800) 464-0988. IMI is a nonprofit trade organization committed to the proper design and detailing of all trowel trades: brick, block, stone, tile, marble, terrazzo, cement finishing, and restoration. IMI is funded by the International Union of Bricklayers and Allied Craftworkers and the Contractors who employ them.

AIA Wisconsin Commissions & Committees

The AIA Wisconsin Board of Directors has established numerous committees of volunteer members to assist in the development of a broad range of programs and services for the benefit of the entire membership and profession. The wide array of AIA Wisconsin committees reflects the varied interests and concerns of the membership.

Your involvement and participation on AIA Wisconsin committees is strongly encouraged. You will benefit from the opportunity to network with other architects from across the state with similar interests. AIA Wisconsin and your fellow members will benefit from the knowledge, skills and expertise you can provide these committees as they shape AIA Wisconsin programs and services.

There also are ample opportunities to get involved with local Chapter committees, task forces and special events. Your participation at the Chapter level can make a big difference. For more information, please contact local Chapter officers in your area.

At the state level, each AIA Wisconsin committee is assigned to one of five commissions: Executive & Administrative, State Programs, Education & Practice, Government Affairs and Component Affairs. Each of these commissions has a "Director Advisor" who is a Director-At-Large on the AIA Wisconsin Board of Directors and who reports on committee activities at regularly scheduled AIA Wisconsin Board meetings.

The following is an outline of the five AIA Wisconsin commissions and their related committees. It contains the mission statement for each committee along with the name and phone number of the committee chairperson.

If the work of a particular committee sounds interesting to you, please contact the chairperson for further details on how you can get involved. If you can't find the committee your looking for, contact one of the director advisors about establishing a new AIA Wisconsin committee.

Executive & Administrative Commission

Director Advisor: Cherie Claussen, AIA, (414) 278-3301

Executive Committee

To exercise general supervision over the affairs of AIA Wisconsin; to assure that all administrative, financial and other matters assigned to officers by the Bylaws and/or delegated to the Executive Committee by the Board of Directors are carried out in an efficient and effective manner; to safeguard and maintain office and other property; to regularly evaluate the job performance of the executive director and other staff; and to serve as the Board of Directors of Wisconsin Architect, Inc.
Chairperson: Gary Gust, AIA, (715) 235-9081

Editorial Advisory Board

To provide regular advice and counsel to magazine staff and to develop recommendations for the Board of Directors to assist *Wisconsin Architect* magazine in achieving its established purposes of featuring the work of member architects in a creative format, providing practical informative articles of educational interest, keeping members informed of current activities and programs, and presenting a forum for material suppliers to advertise their products and services.
Chairperson: Mark Kruser, AIA, (608) 294-0206

Wisconsin Architects Foundation
To promote the science and art of planning by advancing the standards of architectural education, training and practice; to provide scholarships to Wisconsin students pursuing degrees in architecture; to provide program grants to student chapters at universities and technical colleges in Wisconsin; and to support programs and activities that increase the public's awareness and appreciation of architecture and architects.
Chairperson: Michael Kadow, AIA, (920) 437-8136

AIA Regional Directors
To represent North Central Region on the national AIA Board of Directors and to communicate with the leadership of components in the region.
Directors: Lisa Kennedy, AIA, (414) 302-5650, Jim Gersich, AIA, (608) 662-1341

State Programs Commission
Director Advisor: Michael Clark, AIA, (920) 459-4200

Convention Committee
To work with Board of Directors, staff and other committees to plan, promote, coordinate and conduct an annual statewide conference on design, practice and technology issues that is attractive to members, allied professionals and material suppliers and that achieves or exceeds financial goals established by budget.
Chairperson: Melissa Destree, AIA, (608) 835-2605

Design Awards Committee
To convene an annual design awards jury for selection of the work of member architects that merits recognition for design excellence; to assist in disseminating the results of this selection to members and public through *Wisconsin Architect* magazine, the annual Convention and media, thereby fostering public awareness of the work of member architects; and to encourage dialogue by the public and among members of the purpose and direction of architectural design in Wisconsin.
Chairpersons: Katherine Schnuck, AIA, (414) 290-3772, Jim Rasche, AIA, (414) 290-3709, Mark Kruser, AIA, (608) 294-0206

Golden Award Committee
To screen and rank Golden Award nominations for submission of recommendation to AIA Wisconsin Board of Directors.
Chairperson: Frank Dropsho, AIA, (608) 238-3426

Firm Award Committee
To develop recommendations for the Architecture Firm Award program, coordinate the awards program, and assist in the selection of the jury.
Chairperson: John Horky, AIA, (414) 272-2000

Fall Workshop Committee
To work with Board of Directors and staff to plan, promote and conduct an annual one-day workshop on practice issues of interest to members.
Chairperson:

QBS Committee
To create, maintain and improve a resource readily available to public owners and members for the objective, informed, responsive and professionally responsible promotion of Qualification Based Selection (QBS) procedures; to monitor QBS program and advise the Board of Directors as to its operations; to establish objectives, recommend policies, approve presentation materials, promote owner and member participation, coordinate with related professional organizations and evaluate program performance.
Chairperson: Mike Gordon, AIA, (608) 274-2741

Education & Practice Commission
Director Advisor: Henry Kosarzycki, AIA, (262) 548-8615

Dean's Advisory Group
To establish a more formal link and format for increased dialogue between the UWM School of Architecture & Urban Planning and the profession by providing for discussion with the Dean on School-related issues and programs in conjunction with regularly scheduled meetings of the AIA Wisconsin Board of Directors.
Chairperson: Bob Greenstreet, Dean, (414) 229-4016

Associates Group
To increase communication and interaction among Associate AIA members, other interns, Architect members, architecture students and faculty and to encourage increased participation in AIA programs by Associate members and interns.
Chairperson: Bill Danuser, Assoc. AIA, (608) 826-0150

Intern Development Program
To inform and educate interns and practitioners about the Intern Development Program (IDP) and related requirements to become credentialed as an architect in Wisconsin.
Chairperson: Russ LaFrombois, AIA, (414) 944-9000

Young Architects Forum
A group of young architects who gather locally: to discuss common goals, problems, experiences and thoughts about their careers, the profession and design; to encourage professional growth and leadership development through interaction and collaboration within the AIA and allied professions; and to build a state, regional and national network and collective voice for young architects.
Chairpersons: Michael Eberle, AIA, (608) 232-1332, Paul Grzeszczak, AIA, (608) 232-1234

Continuing Education Committee
To research and make recommendations to Board of Directors and Chapters regarding continuing education programs and policies to meet members' needs and expectations.
Chairperson: E. Mitchell Spencer, AIA, (715) 232-1176

Electronic & Technology Media Committee
To identify and evaluate present and future technologies and electronic media and how they relate to architecture; to educate the profession through reports, articles and seminars as to what technologies are available, the pros and cons of each and what the future holds; to proactively interact with and influence the suppliers and creators of these technologies and electronic media to address the concerns of the profession; and to serve as a conduit for sharing information between the profession and the creators of these technologies.
Chairperson: Steve Groth, AIA, (414) 271-8899

AIA Documents Committee
To assist the AIA Documents Committee by encouraging and compiling recommendations from Wisconsin members on possible revisions to AIA documents.
Chairperson: Steve Steen, AIA, (414) 290-3791

AIA/AGC Liaison Committee
To improve working relations between AIA Wisconsin and AGC members; to enhance understanding of contract documents; and to develop recommended practices for use by architects and contractors.
Chairperson: Gerald Schwoch, AIA, (608) 276-9200

Government Affairs Commission
Director Advisor: Carl Scott, AIA, (920) 738-7707

Legislative Committee
To identify public policy issues of importance to Wisconsin's design and construction industry; to develop positions and make recommendations on legislative issues of interest and concern to the architectural profession; to lobby appropriate legislative committees and administrative agencies; to encourage the active grassroots participation of members in the legislative process; and to communicate with other professions that have similar legislative concerns.
Chairperson: Bob Shipley, AIA, (608) 238-7626

DFD Liaison Committee
To establish a continuing dialogue with the state Division of Facilities Development and a format for discussion and resolution of issues of mutual interest and concern.
Chairperson: Mark Kraft, AIA, (608) 233-5800

Safety & Buildings Liaison Committee
To establish a format for ongoing discussion and resolution of building code, plan review and related issues of concern to the profession and the Safety & Buildings Division, Department of Commerce.
Chairperson: Warren Bauer, AIA, (608) 274-2741

Component Affairs Commission
Director Advisor: Kent Calloway, AIA, (608) 232-1277

Membership Committee
To develop and implement programs and materials for expanding membership and for increasing membership retention and participation; to profile and analyze membership attitudes and needs for use in planning member recruitment programs, developing methods to encourage increased member participation and recommending new programs and services to respond to member needs.
Chairpersons: Colin Klos, AIA, (608) 785-2760, Modesto Tavarez, AIA, (608) 833-4888

Public Awareness Committee
To encourage architects to work together to develop and maintain a clear understanding of the present and future roles architects play in society so to effectively position the profession to be of greatest service; to develop materials and programs to expand the public's awareness of architecture and architects as well as architect's awareness of the public's needs and expectations.
Chairperson: Tom Hirsch, AIA, (262) 650-3629

Architects in Schools
To encourage and assist architects in presenting programs on architecture in local schools by developing statewide network of AIA members and teachers interested in creating and promoting these opportunities.
Chairperson: Horst Lobe, AIA, (608) 833-4641

Fellowship Committee
To identify and recommend to the Board of Directors candidates for nomination for advancement to the AIA College of Fellows; to encourage members to seek advancement; and to assist candidates in the preparation of nomination materials.
Chairpersons: Jim Miller, FAIA, (608) 836-7732, Gary Zimmerman, FAIA, (414) 918-1440

Historic Resources Committee
To encourage the preservation of Wisconsin's historic resources; to promote within the architecture profession and the general public a greater awareness, appreciation and respect for those historic resources; to provide leadership, programs and technical support within the profession on preservation-related issues, serving as a source of information and education.
Chairperson: Ron Siggelkow, (608) 662-1364

AIA Wisconsin Membership Directory

AIA Wisconsin is the statewide component of The American Institute of Architects. With 1,400 members, AIA Wisconsin represents Wisconsin architects and allied professionals in private practice, businesses, industry, government and education.

The American Institute of Architects is the voice of the architecture profession dedicated to serving its members, advancing their value and improving the quality of the built environment. the AIA serves architects and their clients by promoting ethical, educational and practice standards for the profession and by advocating excellence in design.

AIA Wisconsin is composed of four local Chapters: Southeast, Southwest, Northeast and Northwest. Each AIA Wisconsin member also is a member of one of these local Chapters.

The accompanying *2002 AIA Wisconsin Membership Directory* is divided into four sections corresponding to AIA Wisconsin membership categories as follows

AIA Members: Registered architects who are Architect members of The American Institute of Architects (AIA). Within this membership category, Fellows of The American Institute of Architects are designated by FAIA.

Associate Members: Associate AIA members include individuals without architectural registration from a U.S. licensing authority who either are eligible by education and experience and actively working towards licensure as an architect, employed under the supervision of an architect, have a professional degree in architecture, are university faculty involved in architectural research or teaching, or have an architectural license from outside the U.S.

Professional Affiliate Members: Individuals who are not architects, but who may be registered to practice their professions where such requirements exist. The category includes professional engineers, landscape architects, interior designers and other professionals whose work is related to architecture.

Student Affiliate Members: Undergraduate and graduate students attending architectural schools and technical colleges in Wisconsin.

The *AIA Wisconsin Membership Directory* includes the following information for each member: name, firm name, mailing address, daytime telephone number and local Chapter. The *Directory* is updated annually through a survey of all members conducted each fall.

If you have any questions, comments or suggestions regarding this *Membership Directory*, please contact: AIA Wisconsin, 321 S. Hamilton Street, Madison, Wisconsin 53703; (608) 257-8477/1-800-ARCHITECT; aiaw@aiaw.org.

You and Your Architect

Whether you are building your own home or planning a commercial facility, selecting the right architect is important to a successful project. The architect is the one professional who has the education, training, experience and vision to guide you through the entire design and construction process, from helping you define what you want to build to helping you get the most for your construction dollar. Working with other design and construction professionals, an architect can help you achieve a well-designed project that meets your needs and works within your budget and time frame.

Architects analyze your functional needs, long-term goals and budget. Using this analysis, the architect designs a building that helps meet your current and future needs. When designing a building, an architect seeks to balance several often conflicting elements, including function, aesthetics, economics and technology. And the architect must balance these elements within the context of building codes and zoning regulations.

Wise Investment

Architects are trained to solve problems in creative ways, translating your needs into square feet and three dimensional space. With their broad knowledge of design and construction, architects can show you alternatives and options you might never think of on your own.

The architect's services are a wise investment because:

- *A well-designed project can be built more efficiently and economically.* Architects plan your project with you. As your ideas evolve, changes can be made on paper much less expensively than later on when construction is underway. Thorough drawings also make it easier for the contractor to accurately price and build your project.

- *Energy efficient building design can save you money on fuel bills.* An architect can design a building to maximize heating from the sun and let in natural light, thus reducing your heating, cooling and electric bills over time.

- *The architect can work with your budget and help you select the appropriate materials and workmanship at a fair price.* Architects develop the drawings and specifications to help you get bids for construction that are based on your requirements.

- *An architect can help you choose materials and finishes that are durable as well as beautiful, saving on frequent maintenance and replacement costs.* Their familiarity with the full range of materials enables them to suggest the appropriate materials for your project.

- *Good design sells.* A well-designed house has a higher resale value. A well-designed store draws customers. A well-designed work environment attracts employees and increases productivity.

- *The architect can make your life easier.* Building is a long process that is often disruptive, particularly if you are living or working in the space under construction. The architect you hire looks out for your interests and tries to find ways to make that process go smoothly.

- *If your project requires engineering or other design services, the architect can coordinate this team of experts so you don't have to.* The architect sorts out complex building codes and zoning laws. The architect can help you find qualified construction contractors based on your requirements. The architect visits the construction site to help verify that the project is being built according to plans and specifications.

Your Architect

Your architect will work with you to:

- *Help clarify and refine your building needs.* Through a process called programming, the architect examines your requirements, budget and building site and then works with you to define what is to be built and to establish the project's scope.

- *Help you look ahead.* Architects are planners who look beyond your immediate requirements to design flexible buildings that will adapt to your changing needs. For example, architects think about how to accommodate changing computer/communications technology.

- *Help manage the building project.* From conception to move-in, the architect is your project leader. As the central clearinghouse for ideas, schedules and every other facet of the project, the architect manages and coordinates the project elements.

- *Help maximize your construction dollar.* A building designed for maximum energy efficiency can cut your heating and fuel bills. The architect's efficient use of space may reduce the square footage you require. A well designed building not only can reduce initial costs, but also can increase its value.

- *Take a broad view.* Architects look at the impact the building will have on the people who use it, the surrounding area and the natural environment. The result is the creation of office spaces that make interaction between departments move more smoothly, retail areas that display your products in their best light and prompt customers to buy, and factory and administrative environments that stimulate employee productivity and satisfaction.

Selection

Architecture firms come in a variety of sizes and types. Each firm brings a different combination of skills, expertise, interests and values to its projects. Some firms specialize in one or more project or facility types. Some firms include in-house engineering services (e.g. civil, structural, mechanical or electrical) or other design disciplines (e.g. planning, urban design, landscape architecture or interior design). Many other architects introduce these disciplines through appropriate consultants. The right kind of firm for your project will depend on the specific demands of your project and what you are looking for in an architect.

First-time clients, and even experienced clients facing new situations, often have many questions about architect selection. The following are some of the more common:

- *When should I bring the architect into the picture?* The best time to bring in an architect is as early as possible in the project. Long before plans and specifications are developed, there are many crucial decisions to be made. Architects can help you define the project in terms that provide meaningful guidance for design. Working with a preliminary evaluation of your needs, an architect can help you find a site that presents the best opportunity to construct the kind of building you envision. Other predesign services architects offer include economic feasibility studies, assistance in developing project budgets and schedules, and help in obtaining project financing.

- *Should I look at more than one firm?* Usually, yes. The exception, of course, arises when you already have a good relationship with an architect and it makes little sense to change.

- *How do I find potentially suitable firms to contact?* Start building a list of potential architects. Contact other owners who have developed similar facilities and ask who they interviewed and ultimately selected. Ask who designed buildings and projects that you've admired or that seem especially appropriate. Get recommendations from friends and relatives who have worked with architects. AIA Wisconsin publishes directories of AIA member architects and member-owned firms. AIA Wisconsin also assists public owners in establishing a complete Qualification Based Selection (QBS) process for their projects.

- *What information should I request?* Contact each firm on your list. Describe your project and ask if they are available to take it on. If they are, request literature outlining the firm's qualifications. If the architect is unable to handle your project, ask if s/he can suggest another firm. The materials you receive from interested firms might include a letter of interest, brochures, fact sheets, photos of past work and biographical material about key personnel. Look beyond the style of the brochure to determine which firms have the right experience and capabilities for your project. At this point, you should be able to narrow your list to the architects you will interview.

- *Why are formal interviews desirable?* An interview addresses one issue that can't be covered in brochures and printed materials: the "chemistry" between you and the architect. It also allows you to investigate how each architect will approach the project. Remember, you will be working with the architect for a long time and will want someone with whom you feel comfortable.

- *How many firms should I interview, and how should they be selected?* Most people advise that you interview between three and five firms, enough to see the range of possibilities, but not so many that an already tough decision will be further complicated. Treat each firm fairly, offering, for example, equal time

and equal access to your site and existing facilities. Ask to meet the key people who will work on your project.

- *What can I realistically expect to learn from an interview? How can I structure the interview to make it as informative as possible?* During the interview, ask a lot of questions. You can learn how the team the architect has put together will approach your project. Ask how the architect will gather information, establish priorities and make decisions. Ask what the architect sees as the important issues or considerations in the project. Evaluate the firm's interest in your project. Evaluate the firm's style, personality and approach: are they compatible with yours? If, during the interview, there is something you do not understand, ask the architect for clarification.

- *How should I follow up?* Tell each firm what you intend to do next and when you plan to make your decision. If you haven't talked with past clients, do so now. Assess both the performance of the firm and the performance of the resulting architecture. You may want to visit existing buildings to see them in use. Notify the selected firm as soon as possible. Remember, conditions change; the firm may not be able to offer the same project team if you must take several weeks or months to decide.

- *On what should I base my decision?* Personal confidence in the architect is paramount. Then seek an appropriate balance among these factors: technical competence, professional service, cost and design skills. Once you've selected the best firm, enter into detailed negotiations of services and compensation. If you cannot agree on contract terms, begin negotiating with your second choice.

Additional Guidance

However the architect selection process is approached, it is worth taking the time to do it well. Here's some additional guidance:

- *You are engaging the services of a professional.* You will work closely with the architect through the life of the project, and your relationship may extend to future projects. Invest at least the care it takes to select a financial or legal advisor.

- *Yours will also be a business relationship.* Find out how prospective architects do business, how they work with their clients, how responsive they are to your management and decision styles, and how well their work stacks up against their clients' expectations. The best way to find out is to talk with other owners for whom the firm has provided professional services.

- *Ask questions.* Respect the architect as a professional who will bring experience and specialized knowledge to your project. At the same time, don't be afraid to ask the same questions you've asked yourself: What does the architect expect from the project? How much information does the architect need? How does the architect set priorities and make decisions? Who in the firm will work directly with the client? How will engineering or other design services be provided? How does the firm provide quality control during design? What is the firm's construction-cost experience?

- *Be frank.* Tell the architect what you know and what you expect. Ask for an explanation of anything you don't understand. The more on the table at the beginning, the better the chances for a successful project.

- *Get it in writing.* Once you have found the architect, you are ready to put in writing the terms of your agreement regarding the scope of work, services, schedule, construction budget and architect's compensation. This written agreement can take many forms. The American Institute of Architects has developed a variety of standard contract forms which are used industry-wide. The AIA Wisconsin office maintains a complete inventory of these AIA contract documents.

Successful Projects

The best building projects are created when the client and architect work together as a team. Both you and your architect can take specific steps to help meet your quality, time and budget goals.

Design and building are group activities. Many people and firms come together to do a project. They may not have worked together before; and they may not work together again. They collaborate to produce a unique building on a specific site. As the project unfolds, hundreds of individual design decisions and commitments are made. Needs and conditions change; and work is modified. A strong and healthy relationship between owner and architect is essential to keep the project on track.

Design and construction projects typically involve several steps or phases. These may include: programming, schematic design, construction documents, bidding or negotiation with contractors and construction. However, on some projects several of these steps may be combined; on others there may be additional phases involved.

The architect's involvement normally does not stop with the preparation of construction documents. Architects also provide construction administration services. These services may include assisting you in hiring the contractor, making site visits, reviewing and approving the contractor's applications for payment and keeping you informed of the project's progress.

The path to a successful building project is paved with lots of challenges and uncertainty. There are literally hundreds of decisions to be made, decisions which have a strong impact on how the project looks and functions over time.

Designing a building is exciting and creative. Both the architect and building owner bring something to the relationship that the other needs. As the owner, you have a building goal and the financial resources to realize that goal. The architect brings extensive professional training and experience, creativity and project management skills.

Be open to new ideas. Be candid about how you want the end result to feel and look. It is important that you or someone from your company be very involved with the project, asking questions and providing information to the architect.

Experience tells us that successful projects — those that respond to owner needs and aspirations, that are accomplished within schedule and budget and that contribute to the quality of our communities and our lives — result from clients and architects who form solid professional and business relationships. These relationships are formed early on and are nourished by clear expectations and a willingness of both you and your architect to accept your responsibilities for achieving a successful project.**WA**

This brief introduction to selecting and working with an architect was adapted from three publications by The American Institute of Architects: A Beginner's Guide to Architectural Services, You and Your Architect, *and* Building Relationships.

Additional information is available at www.aiaw.org. AIA Wisconsin's QBS Owner's Manual, that includes helpful guidelines and checklists for public owners is a vailable for downloading at www.aiaw.org.

For directories of AIA Wisconsin members and further assistance, please contact: AIA Wisconsin, 321 S. Hamilton Street, Madison, Wisconsin 53703; (608) 257-8477 or 1-800-ARCHITECT; aiaw@aiaw.org.

AIA Wisconsin Firm Directory

Design and building are inherently exciting; and there is nothing more satisfying than a successful project. The secret to success lies in the professional relationship between building owner and architect. Whether you are building or remodeling your home or planning a commercial, industrial or public facility, selecting the right architect is important to achieving a successful project.

Members of AIA Wisconsin have been selected for major projects across the country and have received many important awards. AIA Wisconsin member architects have assisted thousands of clients with creative solutions to their building needs.

Investing in the professional services of an architect is a wise use of often very limited building resources. A well-conceived project can be built more efficiently and economically. An architect can design a building to maximize natural light, thus reducing heating, cooling and electric costs. Your architect can help you select materials and finishes that are durable as well as beautiful, saving on maintenance and replacement costs. A well-designed store draws customers and a well-designed work environment attracts good employees and increases productivity.

If you need the professional services of a qualified architect, you will find a suitable firm in this *2002 AIA Wisconsin Firm Directory*. The firms listed will welcome the opportunity to discuss your project with you.

The *AIA Wisconsin Firm Directory* includes the following information on each firm: firm name, address, county, telephone and fax numbers and e-mail and Web site addresses; names of the principals or partners of the firm; number of registered architects and total employes; and a description of the firm's practice.

The information contained in the *Directory* was provided by the firms as part of an annual survey of AIA Wisconsin members. It is a roster of firms owned by AIA Wisconsin member architects. To be listed, at least one of the firm's principals or partners must be a registered architect and an AIA Wisconsin member.

You are encouraged to keep the *2002 AIA Wisconsin Firm Directory* handy for reference throughout the year. Contact the firms listed for further information about their practice and the professional services they can provide for your project. If you have any questions or suggestions regarding the *Directory*, please contact: AIA Wisconsin 321 S. Hamilton Street, Madison, Wisconsin 53703; (608) 257-8477/1-800-ARCHITECT, aiaw@aiaw.org.

Cedar Corporation is a multi-disciplinary professional consulting firm engaged in building design and engineering, environmental, business planning and civil and municipal engineering. Within our staff, we have architectural, interior design, structural, energy management and electrical/ mechanical design capabilities, providing clients with a comprehensive range of services and the benefit of complete coordination between disciplines. Project continuity and efficiency result from design teams being in close proximity and sharing the same systematic approach to documentation. We are experienced in schools, industrial buildings, churches, city halls, community centers, clinics, fire stations, libraries, medical offices, multi-family housing, nursing homes, offices and town halls.

Registered Architects: 2
Total Employees: 6

Design II, Ltd., has numerous areas of concentration due to being awarded a high number of church projects, motels and housing facilities. The firm remains popular with church communities and motel franchises due to their manageability of budgets and their accompanying restrictions. Design II, Ltd., has met the challenge of matching original architecture for church facilities which displays quality appreciation for historic preservation. In conclusion, Design II, Ltd., is an attractive choice because of abilities concerning functional design, feasible time schedules and budget guidelines.

The principles of green architecture and sustainable design underlie the planning, design and construction management services provided by Dimension IV. Building projects include community buildings (community centers, churches, day care); work environments (offices, clinics, industrial facilities, government buildings), elderly care facilities (nursing homes, CBRF's, retirement homes) and private residences. In addition to basic architectural services for these projects, Dimension IV also provides existing facility surveys, needs analysis, long-range planning, building programming, feasibility studies, detailed cost estimates, post occupancy evaluations and architectural model building. Construction budgets are generally between $30,000 and $3 million. General consultations are also available.

Genesis Architecture provides a full range of architectural services for residential, religious and commercial building types and has received national recognition for its award-winning designs. With a special emphasis on Prairie and organic design, we design projects that have a close relationship to the site, express the beauty of natural materials and achieve an inner harmony of parts that gives evidence of integrated, holistic design. The design of furniture, light fixtures and stained glass is often done to enhance the unity of the architecture with interior furnishings. 2D and 3D computer modeling is used along with hand rendered drawings to best convey design and construction information.

Haag Müller, Inc., has been a full service architectural/engineering design firm since it's inception in 1977. From the very start we have provided our clients with the personal attention each project deserves. Our attention to detail is not compromised by the size of the project. Our experience includes muncipal, commercial, financial, food services, light industrial, medical, health/fitness, historic preservation, adaptive re-use, design/build projects, hotel, elderly housing, multi-family, and single family. With computer generated drafting and modeling plans, we are progressive in thought and function. We look carefully at each project to determine it's specific needs and any conditions that could have a greater and healthier impact for all involved. Our Web site provides photos of some of our past projects, as well as projects that are currently "work-in-progress." We will continue to work closely with the client to attain the goal of the project and the satisfaction of the customer.

As a collaborative of architects and historians, Isthmus Architecture, Inc., is committed to preserve the architectural and cultural landscape in a manner that respects original context and design intent. Our practice focuses primarily on rehabilitation, restoration and adaptive reuse projects for residential, commercial, institutional and government clients. Striving to secure the ongoing viability of the existing built environment as it functions in a modern world, we create design solutions that not only foster the preservation of older buildings, but also effectively address the client's intended use of the structure. Our solutions are predicated on an understanding of the technologies and methodologies that facilitate the restoration and rehabilitation of historic buildings and settings. We offer predesign services including facility assessment, research and documentation, master planning, programming and historic construction reports. Design services include restoration, rehibilitation, renovation, adaptive reuse, additions, new construction and interior design.

We pursue an architecture of ideas, soundly executed and thoroughly serviced. Our method is centered on the needs of the client, on developing appropriate architectural responses and on building within clients' means and schedules. KEE Architecture is organized traditionally: projects are closely managed by principals, allowing full interaction with clients. We are especially capable in corporate and commercial offices, government and community facilities and complex renovation work.

Thomas Kloiber & Associates has provided architectural and design services in Wisconsin and Michigan since 1977. Our experienced professionals offer CADD computer graphics and specification systems, provide feasibility studies, evaluations of existing buildings, ADA compliance surveys and implementation programs. Our smaller staff focuses on individual projects for a closer understanding of the owner's needs. We have developed award-winning designs for educational, religious, governmental, medical, nursing home and CBRF, industrial, sports, theatrical, commercial and residential facilities. We've gained widespread recognition for cost control and innovative planning systems. Additional services such as functional designs and feasible time schedules make Thomas Kloiber & Associates a distinctly advantageous choice.

Potter Design Group, Inc., is founded on quality design and service with the precept of developing projects which are sensitive to budget, program and context. During our 35 years of practice we have developed an affinity for library, church, municipal, academic, housing, elderly care and adaptive reuse projects. Our collective experience is architecturally centered, although interests in landscape architecture, urban planning, lighting and exhibit design distinguish us. We define ourselves by our ability to respond to various building and design opportunities. Regardless of the project, our commitment to refined architecture is consistent. Our numerous awards and repetitive clients confirm our positive contribution to the environment.

With 96 years of tradition,the Zimmerman Design Group is focused on design quality and exemplary service. Utilizing studios comprised of multi-disciplined professionals, ZDG's project experience includes educational facilities, corporate buildings, industrial plants, sports/recreation facilities, multi-family housing, life-care centers, jails, prisons, police stations, fire stations, public safety, DPW, city hall and other government service buildings, renovations, office space planning, hospitals, medical facilities, retail center and parking structures. The company offers complete architectural, engineering, landscape architecture, master planning services and award-winning interior design. Proactive to the changing needs of clients nationwide, ZDG's skilled professionals actualize a project's full potential in direct response to client needs.

Keeping the Momentum Going

After the fanfare and flurry of activities during the the UW Milwaukee School of Architecture and Urban Design (SARUP) 30th Anniversary last year, there is always the worry of an anticlimax, an empty, boring year with little to report. Fortunately, there were sufficient new initiatives on all fronts to keep the momentum going.

At the campus level, the School was very prominent in the launch of a new program called Campus Design Solutions (CDS). This initiative consists of teams of faculty and students undertaking design projects on campus and in the community, both as an adjunct to existing studios and classes and through a specially formulated "Quick Response Team." Over 35 projects were either completed or begun in the last year, and the results can be viewed at the following website: http:llwww.uwm.edu/Milwaukeeldea/CDS.

We presented CDS' work to the Board of Regents last summer, and they were very impressed by the quality and breadth of their accomplishments.

In addition to a lively year in the Architecture and Urban Planning building, culminating in a really splendid Thesis Day, our Alumni Association produced another great series of events. Of particular note was the inspired entry to Milwaukee's Gallery Night, where students, faculty and alumni participated in "Unbuilt Milwaukee," a view of what the city could have been if these projects had gone ahead.

As a part of the existing Gallery Night (where all the downtown galleries are open in the evening and attract huge crowds); SARUP was very noticeable in the strength of our theme and the quality of the work, and we hope for another memorable evening this year.

Please keep an eye on our newly revamped web page; and I look forward to seeing you at one of our many events in 2002 or back here in the building.

Legislative Agenda

Members of AIA Wisconsin are interested in numerous public policy issues being addressed at the local, state and federal levels. These issues extend not only to proposed state legislation and administrative rules governing the design and construction industry and the practice of architecture, but also to policies that affect Wisconsin's quality of life, economic climate, natural environment and public health and safety.

During the 1999-2000 session of the Wisconsin Legislature, nearly 1,500 individual bills were introduced, with just under 200 of these ultimately enacted into law. The AIA Wisconsin Legislative Committee tracked and monitored 45 key legislative proposals. The greatest attention and lobbying effort focused on provisions contained in the state budget bill having to do with the use of design/build by local governments, state aid for school construction, funding for the Percent for Art program, "smart growth" and comprehensive local planning. AIA Wisconsin also was actively involved with state administrative agencies on issues related to the state building program, state building code and architectural licensing laws.

The following provides a brief summary of important legislative issues expected to be addressed during the next legislative session.

- **State Building Code**
  AIA Wisconsin supports the adoption of the *International Building Code* and related model codes as the state building code with a minimum of amendments. On "Wisconsinism" for the past three years, AIA Wisconsin members have been serving on advisory code councils to assist the Safety & Buildings Division of the Department of Commerce in the transition to the *IBC*. The current timeline is to hold public hearings on the proposed code packages early in 2001 and to submit code recommendations for legislative review in the spring, with adoption as of July 2001 and an effective date of July 2002. The fire service intends to support delaying the adoption of the *IBC* to wait for a new model code being developed by the NFPA. It will be important for AIA Wisconsin members to participate in the public hearings and be actively involved in the legislative review process.

ADOPTED

- **Design/Build for Local Governments**
  AIA Wisconsin effectively lobbied to remove ill-defined design/build provisions from the state biennial budget and testified against separate legislation that would have authorized its use by counties, municipalities, libraries and sewerage districts. Similar legislative proposals are expected to be introduced during the upcoming session. The Governor may include limited design/build authority for local governments in his budget recommendations for the next biennium, with price to be the primary selection criterion. AIA Wisconsin supports qualifications-based selection of architects for public projects and is working with a coalition of design and construction industry organizations on this complex and controversial issue.

- **Sales Tax Exemption for Construction Materials**
  AIA Wisconsin supports legislation, similar to 1999 Senate Bill 470, that would provide a simple and straightforward process for allowing a sales and use tax exemption for construction materials used in projects by public and other exempt owners. While it is possible under current law to avoid paying sales taxes on such materials through direct purchase by the tax-exempt owner, existing state administrative requirements make compliance unnecessarily cumbersome, complex and expensive. The Governor may include sales tax exemption provisions in his state budget recommendations for the next biennium.

- **Pre-Construction Lien Law**
  AIA Wisconsin supports legislation that would clarify that architectural plans and specifications constitute improvements to land and that architects providing such services may obtain construction liens for the value of the services provided. Under current law, architects do not have such lien rights until there is physical improvement to the property. Corrective legislation was proposed in 1997 legislative session; and AIA Wisconsin will push for pre-construction lien rights for architects as part of an expected comprehensive lien law review.

- **Licensure: Education & Experience Requirements**
  AIA Wisconsin supports legislation that would adjust the minimum experience and education requirements for licensure as an architect in Wisconsin. Under current law, applicants with an accredited architecture degree must have at least two years of practical experience and applicants without such a degree must have at least seven years of experience or a specified equivalent combination of education and experience. AIA Wisconsin supports legislation initially proposed by the Architects Section of the Joint Examining Board during the 1997 legislative session that would require graduates of an accredited architecture school to have at least three years of practical experience and applicants without an accredited degree to have at least 13 years of practical experience or an equivalent combination of education and experience.

- **Licensure: Continuing Education**
  The AIA believes that all architects should maintain a professional standard of competence and supports lifelong learning and continuing education programs to supplement active practice. AIA Wisconsin supports mandatory continuing education for license renewal of architects consistent with established AIA Continuing Education System requirements.

- **Statute of Repose**
  After a multi-year lobbying campaign, AIA Wisconsin was successful, in 1994, in getting a new and improved statute of repose enacted for architects and others involved in improvements to real property. This is the most basic liability protection for architects because it limits the "long tail" [illegible] liability exposure. Wisconsin's current ten-year statute of repose for the design and construction industry is being challenged in a case before the Court of Appeals. If the court rules that the present law is unconstitutional, AIA Wisconsin members must be prepared to aggressively support the enactment of a new statute of repose.

Making the Most of Your Expo Experience

elevation

AIA Wisconsin Convention & Expo
May 1 & 2, 2002
Monona Terrace
Madison, Wisconsin

Someone once told me that they prepare more for a trip to a shopping mall than they do for a visit to a trade show. Does this sound like you? Are you overwhelmed the minute you walk into that large hall and see hundreds of booths, products and vendors in front of you? How can you focus on what you need? I will give you a few tips, based on how I like to approach attending a trade show.

Plan
Focus on specific products and/or vendors. In my role as a product librarian, I receive many requests to research products and their applications. Prior to visiting a trade show, I make note of products that I have recently researched. I also ask around the office to see if anyone is looking for a particular product or service. Even though other staff members may be attending the same trade show , they may not visit the same booths. I focus on my target products by scanning the exhibitor directory that is included in my registration packet. I can quickly determine which vendors I need to visit and where they are located.

If you do not have a specific list of products, but want to efficiently view the exhibits, you can spend the first day simply browsing the exhibits. Gather literature and business cards and take notes about what you see on display. You can review your notes that evening and make a plan for the following day. Your second day will be organized; and you will find the products or services you need in a more efficient manner.

Ask Questions; Give Feedback
Make sure you ask questions and give feedback when you visit a booth. Feedback helps a vendor develop products or services that meet your needs. Ask about products you do not see. Remember that there is a limited amount of space in a booth and a vendor can only fill it with so many products. Tell the vendor what you are looking for and they may offer it.

Budget Your Time
Once you have your list of vendors, plan on spending only 10-15 minutes in a booth. Keep in mind that exhibitors want to meet as many people as possible and to generate business leads. They cannot spend an hour giving you a private product demonstration. If you want a detailed explanation, ask the vendor follow up with a meeting at your office.

Bring Business Cards
Having business cards on hand will allow you to take advantage of raffles and giveaways; and you also can distribute them to vendors so that they can follow up with you after the trade show. Note that the person who follows up with you may not be the same person you met in the booth. Keep your own notes about whom you saw and what product or service you want to further research. Remember that the people who staff booths are busy and may be easily distracted by other attendees. As a result, your contact information may be inadvertently misplaced. Your own notes will allow you to keep track of follow up calls.

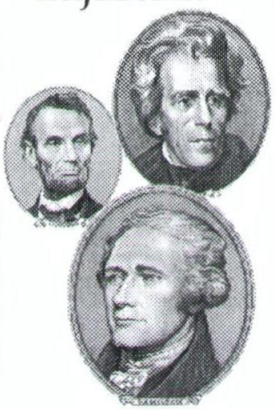
Browse
Build in some time to browse other booths. Just by browsing, I often find products that I did not know existed. I also am on the alert for vendors who offer products similar to ones I already have in my materials library. I never know when I will need to find an equivalent product to one that has been specified.

Review Materials
After the trade show is over, immediately review the information you gathered. If you do it weeks or months later you will have forgotten too much. Take just a few minutes to go through your collection of literature and business cards. Sort them according to importance: ones on which you will take action, ones that will be saved for future reference, others that will be passed along to other colleagues (and don't forget about your materials library!) and still other materials to be discarded.

Remember that a trade show is a unique opportunity to view the offerings of numerous vendors and to discuss products and services directly with managers and technical people. Trade shows allow you to build relationships with your suppliers. If you develop a plan before you go, the trade show experience can help you meet your business and project needs.

EDITOR: The author is a resource librarian at Flad & Associates. Admission to the AIA Wisconsin Expo is free. Please refer to program materials for Expo hours.

Meet our new
no-claims
adjusters!



West Bend Mutual Insurance Company wants to put cash in your pocket with the Premium Value Award®.

When you purchase the Home and Highway® policy, the Premium Value Award® gives you **five percent** of your annual premium back - **in cash** - each year you don't have a claim.

You'll get the convenience of home and auto coverage on one policy with one annual premium, plus discounted rates as a licensed Wisconsin architect. And you could get cash back!

The Premium Value Award® is a claim adjustment that puts cash where it belongs - in your pocket!

To find out more, call the independent insurance agency in your area that represents West Bend Mutual.

RISK REDUCTION:

If Architects Were Knights, We'd Be Shining Armor.

Every profession has its own inherent risks. At Mortenson, Matzelle & Meldrum, we understand and work to reduce the type of risks architecture firms face.

As one of Wisconsin's leading insurance agencies, we are uniquely qualified to determine the type of protection that's right for you. With DPIC and other fine companies, we can custom design a professional liability program that's especially suited to your particular needs.

To find out how we can help protect your firm from the type of risks you face, call the professionals at 608-273-0655 or 800-272-2443.

Golden Award

Frederick E. Zimmermann, AIA, Madison, has been selected by the AIA Wisconsin Board of Directors to receive the 2002 Golden Award.

The Golden Award is the highest honor AIA Wisconsin can bestow on one of its members. Its purpose is to recognize individual architects who have performed most distinguished leadership and service on behalf of the state component of The American Institute of Architects over an extended period of time and who have advanced the cause of the profession of architecture by providing inspiration to their fellow practitioners.

The Golden Award will be formally presented to Zimmermann during a special Awards Luncheon on May 1 at the 2002 AIA Wisconsin Convention at the Monona Terrace Community & Convention Center in Madison.

This year's Golden Award was approved by the AIA Wisconsin Board of Directors at its December meeting in Milwaukee. The nomination highlighted Zimmermann's significant contributions of leadership, energy and vision to AIA Wisconsin, the profession of architecture and the community.

During his distinguished career, Fred Zimmermann not only has managed a successful architectural practice, but also found the time and had the vision to effectively guide AIA Wisconsin for the benefit of his fellow members, protect the profession through vital legislative initiatives and shape the community by his commitment to public service.

As President of the Wisconsin Society of Architects in 1984, he coordinated the successful effort to negotiate the loan, lease and National Landmark status of the Stoner House, the current offices of AIA Wisconsin and the Wisconsin Architects Foundation. He also chaired the state AIA Convention twice. Zimmerman currently serves as the Secretary/Treasurer of the WAF.

As Chair of the AIA Wisconsin Legislative Committee from 1986 through 2001, Zimmermann effectively coordinated a successful multi-year educational and lobbying campaign to enact a new and improved statute of repose to protect Wisconsin's design and construction industry from the "long tail" of liability. During three separate sessions, he also helped lead a coalition of professional and business groups that effectively blocked legislative attempts to expand the state sales tax to architectural services. On several occasions, he played an instrumental role in improving the state's contract for architectural services.

Appointed by the mayor, Zimmermann represented the architectural profession on the City of Madison's Urban Design Commission from 1991 through 2001 and was a strong advocate for incorporating urban design values in proposed development.

Zimmermann has been a principal of Bowen Williamson Zimmermann, Inc., since 1968. He was named president of the firm in 1996.

Fred Zimmermann is the fifteenth recipient of the AIA Wisconsin Golden Award. Previous Golden Award recipients include: David E. Lawson, FAIA; Paul H. Graven, FAIA; Mark A. Pfaller, FAIA; Wayne E. Spangler, FAIA; Leonard H. Reinke, FAIA; Nathaniel W. Sample, FAIA; Harry A. Schroeder, AIA; John P. Jacoby, FAIA; Noble E. Rose, AIA; Douglas H. Smith, AIA; Gary V. Zimmerman, FAIA; James W. Miller, FAIA; George A.D. Schuett, FAIA; and Roger D. Roslansky, AIA.

2002 Convention

The 2002 AIA Wisconsin Convention & Expo, *Elevation*, will be held May 1 & 2 at the Monona Terrace Community & Convention Center in Madison. Reserve the dates because you will not want to miss this year's line-up of exceptional speakers, professional development seminars, building product and service exhibits, and other special events.

Elevation is the theme for the 71st annual AIA Wisconsin Convention & Expo program. It is a common word with an uncommon meaning, according to Melissa Destree, AIA, Chair of the 2002 Convention Committee. "As architects, we are given the gift to raise from the ground an image that seemingly is suspended in time," Destree believes. "More importantly, we have the power in the things we design and build to raise spirits, exhilarate moods and heighten consciousness. To be successful, we must rise above the ordinary in everything we do."

The featured Convention keynote speakers will address this theme. Award-winning Chicago architect Carol Ross Barney, FAIA, will present the keynote address on May 1. Robert Campbell, FAIA, the award-winning architectural critic with the *Boston Globe*, is the featured keynoter on May 2.

Professional development seminars are featured on both days of the Convention. They will explore emerging design, practice and technology/environmental issues.

The "design" seminars will feature presentations by the award-winning firm KEE Architecture of Madison; noted architect, author and professor Michael Benedikt from the University of Texas on the value of design; and a panel of Wisconsin architects and planners on "livable communities" moderated by Bruce Race, FAIA, of Racestudio in Berkeley.

The "practice" seminars will feature sessions on producing quality documents by Grant Simpson, AIA, and Jeff LaRue, AIA, with HKS Inc. in Dallas; improving your firm's bottom line through designer-led design-build by Martin Sell, AIA; and creating wealth by consultant and author Ellen Flynn Heapes, founder of SPARKS: The Center for Strategic Planning in Washington, DC.

The "technology/environmental" seminars include presentations on the latest tools for energy efficient design by architect David Eijadi, AIA, of The Weidt Group in Minnetonka; daylighting for sustainable design by Mary Guzowski, an associate professor of architecture at the University of Minnesota; and real-life case studies on successful construction waste recycling projects moderated by WasteCap Wisconsin.

The AIA Wisconsin Expo of the latest building products and services will be open both days in the exhibit hall at Monona Terrace. The Expo is free and features the annual "Construction Industry Reception" on May 1 and the "Focus on Innovation" on May 2. AIA members will be able to earn AIA/CES learning unit hours by participating in four or more of the Expo Education Programs sponsored by the exhibiting companies.

The special events to be held in conjunction with the 2002 Convention & Expo include: the Annual Meetings of AIA Wisconsin and the Wisconsin Architects Foundation, Golden Award Luncheon, IDP/ARE Workshop, Firm & Design Awards Celebration, and the WCMA Awards Breakfast.

For information on the 2002 AIA Wisconsin Convention & Expo, *Elevation*, please contact the AIA Wisconsin office at (608) 257-8477, 1-800-ARCHITECT or aiaw@aiaw.org

Fellowship

The AIA Fellowship program was developed to elevate those architects who have made a significant contribution to architecture and society and who have achieved a standard of excellence in the profession. Election to Fellowship not only recognizes the achievements of the architect as an individual, but also honors before the public and the profession a model architect who has made a significant contribution to architecture and society on a national level.

Fellowship is the highest honor an architect member can receive. AIA Wisconsin is proud to have eleven Fellows as members.

Candidates may be nominated in one of the following five categories, which correspond to the objects of the Institute:

- *To promote the aesthetic, scientific, and practical efficiency of the profession.* Fellowship in this category is granted to architects who have produced distinguished bodies of work through design, urban design or preservation. This may be accomplished through individual or organization effort. Works submitted may be of any size, for any client, of any scope and reflecting any type of architectural design service.

- *To advance the science and art of planning and building by advancing the standards of architectural education, training and practice.* Fellowship in this category is granted to architects who have made notable contributions through their work in education, research, literature or practice of architecture. Work in education may be teaching, research, administration or writing and should have a lasting impact, be widely recognized and provide inspiration to others in the field and the profession. Research areas may include building codes and standards, specifications, new material applications or inventions. Practice includes firm management, administration or project management.

- *To coordinate the building industry and the profession of architecture.* Fellowship in this category is granted to architects who have actively, efficiently and cooperatively led the Institute, or related professional organizations, over a sustained period of time and have gained widespread recognition for the results of their work.

- *To ensure the advancement of the living standards of people through their improved environment.* Fellowship in this category is granted to architects who have made notable contributions in public

service or work in government or industry organizations through leadership in the development of civic improvements and needed governmental projects, including such elements as conservation, beautification, land-use regulation, transportation or the removal of blighted areas, or who have clearly raised the standards of professional performance in these areas by advancing the administration of professional affairs in their fields.

- *To make the profession of ever-increasing service to society.* Fellowship in this category is granted to architects who have made notable contributions to the public good through alternative careers or volunteer work with charitable organizations not directly connected to the built environment. Achievements may be of a kind that transcend the other categories for advancement to serve society or humanity in a unique and important manner.

The AIA Wisconsin Board of Directors and Fellowship Committee have discussed how to encourage more Wisconsin members to pursue Fellowship. Architects who have been AIA members for at least ten years are eligible.

Candidates may be nominated by the Board of Directors, five Fellows or ten AIA architect members. Traditionally, interested candidates work with a member of the Fellowship Committee, who serves as a sponsor and assists with the preparation of the nomination materials submitted to the Jury of Fellows.

For more information or to request nomination materials, contact the AIA Honors and Awards Department at (202) 626-7586. You also may want to contact the co-chairs of AIA Wisconsin's Fellowship Committee: James W. Miller, FAIA, at (608) 836-7732 or Gary V. Zimmerman, FAIA, at (414) 476-9500.

Distinguished Service

At its December meeting in Milwaukee, the AIA Wisconsin Board of Directors awarded *Citations for Distinguished Service* to the profession of architecture to the following individuals:

- **Edward J. Kodet, Jr., FAIA**, Minneapolis, was recognized for his contributions and service as national AIA Director for the North Central Region from 1998-2001. He currently serves as a Vice President of the Institute.
- **Thomas M. Pyper**, Black Earth, was recognized for his legal counsel in drafting the new and improved statute of repose for Wisconsin's design and construction industry and in successfully protecting this important legal protection for architects from a recent constitutional challenge. Pyper is a partner with Whyte Hirschboeck Dudek SC in Madison.
- **Wilbert (Bill) L. King**, Madison, was recognized for his contributions and service as State Chief Architect with the Division of Facilities Development, Wisconsin Department of Administration, from 1992-2001. During his tenure, King effectively guided the design and construction of state facilities and encouraged architects to provide the highest quality professional services.
- **Michael F. Corry**, Madison, was recognized for his significant contributions in securing the adoption of the International Building Code in Wisconsin. As administrator of the Safety & Buildings Division, Wisconsin Department of Commerce, Corry effectively negotiated the code development process to build consensus among diverse interest groups and educate state legislators in gaining support for the IBC.
- **Horst W. Lobe, AIA**, Madison, was recognized for his dedication and commitment to coordinating the production of the "How Buildings Speak" video for use by Wisconsin teachers and AIA members to introduce kids to the wonderful world of architecture. Lobe chairs AIA Wisconsin's Architects In Schools program.
- **Diane Bresnan Fleming**, Madison, was recognized for her contributions and service in publishing a book *SimplyWRIGHT*, that invites elementary art students to journey into the ideas of Frank Lloyd Wright's architecture. Bresnan Fleming is an elementary art teacher with the Madison Metropolitan School District. The Wisconsin Department of Public Instruction distributed a copy of her book, with a poster, to every elementary art teacher in the state.
- **Mary A. Lawson, AIA**, Middleton, was recognized for her service and leadership in the development of the AIA Wisconsin Architecture Firm Award. Lawson served as the first Chair of the Firm Award Committee and guided this valuable new program to recognize the significant contributions of member-owned firms.
- **Daniel J. Roarty, AIA**, Green Bay, was recognized for his contributions and service in developing, promoting and coordinating the successful "Lunch Seminars" for AIA Northeast Wisconsin members. This monthly seminar series has provided members with quality continuing education opportunities that are convenient and affordable.

Bill King was presented his *Citation* at the DFD retirement "shindig" in December. The other *Citations for Distinguished Service* will be formally presented at the AIA Wisconsin Annual Meeting on May 1 at Monona Terrace in Madison.

Legislative Report

During the current 2001-02 session of the Wisconsin Legislature, over 1,000 separate bills have been introduced. Of these, 42 have been approved by both the Assembly and Senate and signed into law by the Governor.

The state budget received the most attention during the first year of the biennial legislative session. Budget items of particular interest to AIA Wisconsin included funding for the state building program and state aid for school construction. Proposed Department of Commerce administrative rules to adopt the International Building Code survived the legislative review process without a hearing.

Repairing a $1.1 billion gap in the state budget will be the focus of attention in 2002. Proposals already have been floated to freeze spending on state and local government building projects and to cap state aid for school construction as part of a state budget fix.

The AIA Wisconsin Legislative Committee, chaired by Robert Shipley, AIA, Madison, currently is tracking about 40 legislative proposals introduced so far. Proposals that would increase spending or reduce tax revenues will face tough sledding in the current budget environment.

Examples of Assembly Bills (AB) and Senate Bills (SB) on AIA Wisconsin's legislative radar screen include the following:

SB 123: Various changes relating to historic buildings, including historic building code.

SB 149 & AB 325: Change state school aid formula related to debt service.

SB 265: Income tax credit for the artistic endowment fund.

SB 316 & AB 624: Related to income tax credit for rehabilitating income-producing historic properties.

AB 2: Limit scheduling of local referenda.

AB 436: Transportation impact review of proposed school construction projects.

AB 606: Related to indemnification provisions in construction contracts.

AB 637: Exclude debt service for state school aid funding.

AB 688: Exempt from sales tax materials used in the construction of school district and local government buildings.

If you have questions about these or other legislative proposals, contact the AIA Wisconsin office. This is an election year, with the Governor's office, every seat in the Assembly and half of the seats in the Senate up for grabs this November. AIA Wisconsin members are encouraged to make connections with legislative candidates and to discuss issues of interest to the profession.

Architects Section

The Architects Section of the Examining Board of Architects, Landscape Architects, Professional Engineers, Designers and Land Surveyors has elected the following officers: Dennis M. Cerreta, AIA, Waukesha, *Chair*; Karen E. Sathoff, AIA, Green Bay, *Vice Chair*; and Arno Wm. Haering, Wausau, *Secretary*.

Section member James G. Otto, AIA, Hubertus, has agreed to serve as the IDP Coordinator. Sathoff has indicated that she does not plan to seek reappointment when her present term ends on July 1. (If you are interested in being considered for appointment by the Governor to the Architects Section, please contact the AIA Wisconsin office.)

Over the past year, the Architects Section has spent considerable time discussing the appropriate title that can be used by interns, proposed adjustments in the education and experience requirements for initial licensure as an architect, and the possibility of requiring continuing education for license renewal.

The Architects Section supports an administrative rule change that would allow the use of the title "intern architect" by individuals acquiring the supervised architectural work experience required for licensure as an architect. Documents necessary for state agency and legislative review of the proposed rule change are being prepared.

The Architects Section also is supportive of statutory changes that would modify education and experience requirements for licensure. Under current law, applicants with an accredited architecture degree must have at least two years of practical experience and applicants without such a degree must have at least seven years of experience or a specified equivalent combination of education and experience. The Architects Section has approved a proposal that would increase from seven to ten years the equivalent combination of education and experience required for applicants without an accredited architectural degree. Proposed legislation is being drafted for introduction in the Legislature.

The Architects Section also has discussed the possibility of seeking statutory authority to require continuing education for license renewal.

The AIA Wisconsin Board of Directors supports administrative rules and legislation that would allow the use of the title "intern architect" by unlicensed individuals working under the supervision of an architect, adjust minimum education and experience requirements for licensure to bring them more in line with similar requirements in other states, and require continuing education for license renewal that is consistent with established AIA/CES requirements and recordkeeping.

People & Places

John P. Versey, AIA, Sheboygan, has joined Bamco, Inc., as president.

Thomas Hirsch, AIA, Madison, recently spoke on accessibility at the WHEDA Multifamily Housing Conference.

Mark J. Kruser, AIA, Middleton, **Horst W. Lobe, AIA**, Madison and **Michel P. Eberle, AIA**, Madison, assisted the Masonry Institute of Michigan with their annual Design Awards. The three AIA Wisconsin architects juried approximately 60 project submissions.

Thomas J. Morley, AIA, Greenfield, and **Peter J. Schuyler, AIA**, River Hills, recently juried the Building & Apartment Owners and Managers Association and M&I 2001 Building of the Year (TOBY) Awards.

Edward Johnson, AIA, Hartford has joined Durrant, Inc., as a project architect.

AIA Wisconsin member, **Scott F. Georgeson, AIA**, Milwaukee, announced that his firm, Holabird & Root, has been named the AIA Chicago 2000 Firm of the Year.

Potter Lawson, Inc., Madison, organized donations from staff and several associated firms to provide 32,888 meals for Second Harvest Food Bank of Southern Wisconsin.

Isthmus Architecture, Madison, organized volunteers from the firm and allied professions to assist with a day of meal packaging with the Salvation Army.
